5. Rags or Paper Towels
6. Masking or painters tape
7. Squeegee or Plastic Card (credit card, rewards card)

## How to calculate amount of vinyl needed

**HOW TO CALCULATE SQUARE FEET ARE NEEDED FOR YOUR STORE**

**Measure Entire Glass Surface**

**CALCULATE SIZE OF THIS WINDOW**  
Full color vinyl or see through material.  
 $96'' \times 48'' = 4608/144 = 32 \text{ SqFt}$

**Measure Covered Area**

**CALCULATE SIZE OF DOORS & TOP PANEL**  
Full Color Logo or Vinyl Lettering  
Top -  $38'' \times 12'' = 456/144 = 4 \text{ SqFt}$   
Door1 -  $20'' \times 40'' = 800/144 = 6 \text{ SqFt}$   
Door2 -  $16'' \times 9'' = 144/144 = 1 \text{ SqFt}$

**Measure Covered Area or Image size**

**CALCULATING SIZE OF THIS WINDOW**  
Full color partial combined with vinyl lettering  
Top Vinyl  $38'' \times 42'' = 1596/144 = 12 \text{ SqFt}$   
Bottom  $56'' \times 40'' = 2240/144 = 16 \text{ SqFt}$

If total equals 12.3, round up to 13. Now add the totals from each measurement:  $32 + 4 + 6 + 1 + 12 + 16 = 71 \text{ SqFt}$  Needed  
This is the quantity you need to purchase from us. We will design for you and ship with installation instructions.
