How to calculate amount of vinyl needed

HOW TO CALCULATE SQUARE FEET ARE NEEDED FOR YOUR STORE

Measure Entire Glass Surface

CALCULATE SIZE OF THIS WINDOW
Full color vinyl or see through material.
 $96'' \times 48'' = 4608 / 144 = 32 \text{ SqFt}$

Measure Covered Area

CALCULATE SIZE OF DOORS & TOP PANEL
Full Color Logo or Vinyl Lettering
Top - $38'' \times 12'' = 456 / 144 = 4 \text{ SqFt}$
Door1 - $20'' \times 40'' = 800 / 144 = 6 \text{ SqFt}$
Door2 - $16'' \times 9'' = 144 / 144 = 1 \text{ SqFt}$

Measure Covered Area or Image size

CALCULATING SIZE OF THIS WINDOW
Full color partial combined with vinyl lettering
Top Vinyl $38'' \times 42'' = 1596 / 144 = 12 \text{ SqFt}$
Bottom $56'' \times 40'' = 2240 / 144 = 16 \text{ SqFt}$

If total equals 12.3, round up to 13. Now add the totals from each measurement: $32 + 4 + 6 + 1 + 12 + 16 = 71 \text{ SqFt}$ Needed
This is the quantity you need to purchase from us. We will design for you and ship with installation instructions.
